## EURONICS eG Germany, Ditzingen

The EURONICS eG Germany is the biggest specialist trade cooperative in the area of consumer electronics. The main focus of the dealerships and department stores is in the area of consumer electronics, PC / multimedia, mobile and telecommunications, photographic equipment and building services. The headquarter of Germany eG EURONICS is based in Ditzingen and employs approximately 300 people. In 2010/2011 the company generated turnover of around EUR 1.72 billion.

### INDULVENT ec – Comfort Ceiling Fan Coil System:

Local ceiling fan coil systems allow the flexible use of available space. For high comfort requirements, INDULVENT ec ensures draught-free ambient air flow with high cooling capacity and low sound power levels. The compact unit employs a fan with energy saving EC technology.

#### Advantages:

- Draught-free ambient air distribution with cooling capacity up to 2600 W
- Low sound power levels
- Only electrical, cooling water and condensate connections required
- Energy-saving EC technology
- Stepless power regulation
- Integrated condensate pump
